This information collection identifies solid mineral production from Federal and Indian lease that undergoes secondary processing before royalty determination and is used to track lease production from the mine to the point of royalty determination when royalty is determined after secondary processing. The industry burden is estimated to average 1.5 hours per response, including the time for reviewing instructions, gathering and maintaining data, and completing and reviewing the form. Direct your comments regarding the accuracy of the burden estimate or any suggestions for reducing the burden to the Information Collection Clearance Officer, Mail Stop 2053, Minerals Management Service, 381 Elden Street, Herndon VA 20170-4817, and to the Office of Management and Budget, Office of Information and Regulatory Affairs, Attention: Desk Officer for the Department of the Interior (OMB Control Number 1010-0063), Washington, DC 20503.
